

# I invite you to experience dentistry the way it is *meant to be!*

your specific needs. We are proud to offer our services in a green environment that features paperless charts and light sensors that conserve energy.

Astoria Dentistry offers the best of modern dentistry and technology with the level of service that can only be compared to the days when a doctor used to make house calls.

The goal is to create the personalized feel and comfort that can only be attained thru use of a private health care provider. It is our duty to know everything there is to know about you and tailor your visit to fit

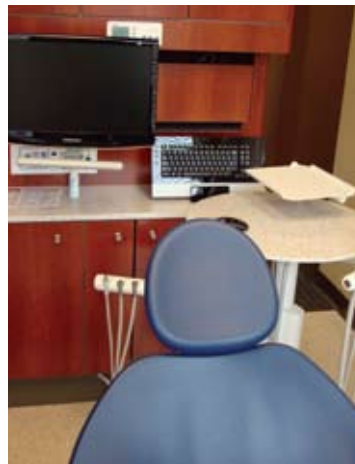

phones, we try to provide you with comforts of home to make your visit as stress free as possible. The Décor and furnishings in the office are meant to warm your senses.

As a Prosthodontist, I specialized for an additional 4 years after dental school in the restoration of beautiful

smiles and in learning about the best materials to use for optimal aesthetics and function. All crowns, implant work and veneers are custom made in house and never leave the premises. This ensures the use of the best materials and expert quality control in a sterile environment.

So if you're thinking about heading over to Dr. Guillaume's office and would like some more info check out his website at [www.astoriadentistryllc.com](http://www.astoriadentistryllc.com).
